Response to Amendment

Allowable Subject Matter

Claims 1-32 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art of record does not show or suggests a method, apparatus or a computer readable medium with instructions to monitor a heart rate of a patient, in a free breathing state, prior to image acquisition such that future R-R intervals can be predicted, based on the observed R-R interval, and then to acquire during this future predicted R-R interval n sets of data representing a segment of k-space. This method is used with a steady state heart beat and does not require a heartbeat to trigger the image acquisition since the image acquisition starts at an arbitrary time in the R-R interval.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
